

## WeRateDogs

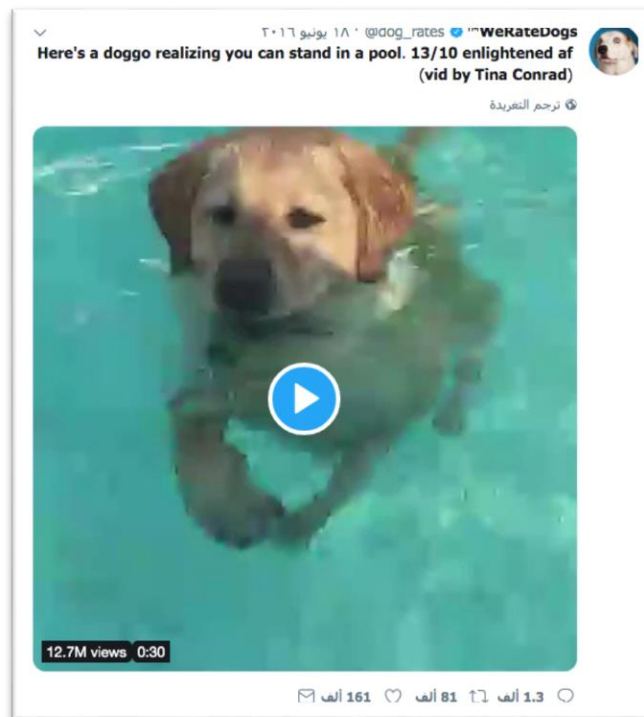

Working in this project was fun and the findings are interesting. First, WeRateDogs is a Twitter account that was started in 2015 by college student Matt Nelson. It rates people's dogs with a funny comment about the dog.

This report will show the insights and displays the visualizations that produced after wrangled twitter account (WeRateDogs) data.

At the beginning, the tweet that has max counts for retweets and favorites was located.

```
retweet_count    79515
favorite_count    132810
```

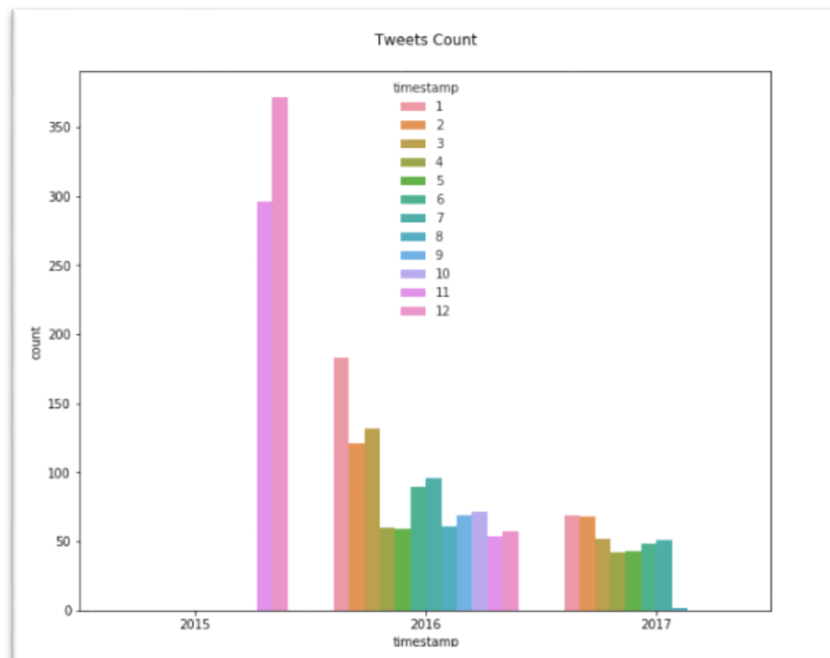

So, this tweet has the largest number of retweets.

And this one has the largest number of favorites.

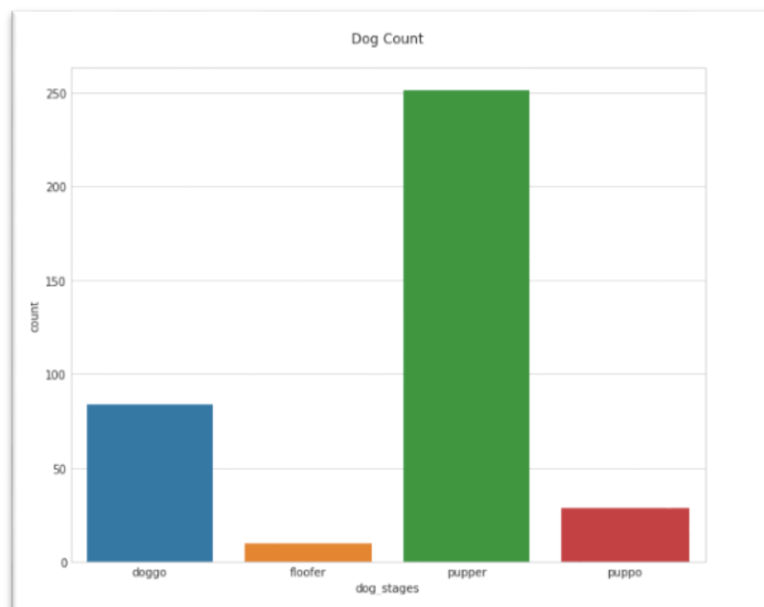

After calculating the number of tweets each month, it clearly appears that the number is decreasing over the time

Now, after cleaning of the data that extracted from the tweet text. Here are the most common names of the dogs

	index	count
0	Charlie	11
1	Lucy	11
2	Cooper	10
3	Oliver	10
4	Tucker	9
5	Penny	9
6	Lola	8
7	Winston	8
8	Sadie	8
9	Toby	7

And about the dog stages it appears that the most tweet has Pupper dog.

At the end, the breed of dogs was counted. Here is the result.

	prediction	count
93	golden_retriever	290
39	Labrador_retriever	283
16	Chihuahua	185
51	Pembroke	143
14	Cardigan	115
52	Pomeranian	109
113	toy_poodle	105
106	pug	97
85	chow	96
87	cocker_spaniel	95
